

VITA GOLD nail solution
Innovation for Healthy & Beautiful Nails

Innovative formula based on synergy of active oxygen, colloidal gold and panthenol. Relieves and visibly improves the symptoms of various negative nail conditions.

Cleanse, nourish, hydrate and oxygenate nails.

Vita Gold nail solution, with its active compounds removes fungal or bacterial infection on nails, improves the structure and the strenght of nails, preserves nails and gives them a healthy look.

This product effectively supplies nails with active oxygen and in this way provides oxygenation for the cells. Active oxygen and colloidal gold synergistically act to cleanse, nourish, hydrate and oxygenate nails.

VITA GOLD nail solution
Strong & Nourished Nails

Regeneration from within

Improves quality of nails

- Repairs damaged nails
- Regenerates
- Nails become more shiny
- Preserves nails and gives them a healthy look
- Acts as antiseptic

Complementary Effect of Special Compounds

Active Oxygen is a natural substance, vital to our body, which enters the cells and activates their oxygenation and regeneration from within.

Colloidal gold helps, with its anti-aging and antioxidant effect, restores normal properties of the skin, strengthening weakened and damaged skin.

Panthenol helps regenerate even more efficiently by delivering moisture to the inner parts of the nail and deeper layers of the skin.

VITA GOLD nail solution
Effective against skin conditions

Vita Gold nail solution helps with:

- ✓ Removing fungal and bacterial infections
- ✓ Nails recovery
- ✓ Strengthening of nails
- ✓ Improving the structure of nails

Vita Gold nail solution relieves the symptoms of various undesirable conditions of the nails and skin through the process of oxygenation and visibly improves their appearance.

How does it work?

Upon contact with the nail surface, active oxygen is released in form of numerous tiny bubbles, which acts positively on nail's condition. If white foam appears after contact with the nail, it means the nail surface area is changed, damaged or infected. **Panthenol** helps regenerate even more efficiently by delivering moisture to the inner parts of the nail and deeper layers of the skin.

Nails become shiny and less brittle, cuticle becomes elastic and soft.
